

## CV | Erich Beat Meier

Fund manager of the NESTOR Gold

Erich Beat Meier has been part of Walter Wehrli's team since April 2012 and advises four funds: alongside the NESTOR Gold, he is also responsible for the Gold2000, Gold3000 and Julius Baer Multipartner Gold Equity funds.

A Swiss citizen, he brings to the table 30 years of experience in the international financial markets. His career began in 1985 at UBS in Emmenbrücke, Switzerland. He completed his banking apprenticeship there, gaining his qualification as a Swiss-certified bank clerk. Mr Meier also qualified as a Chartered Financial Analyst (CFA), specialising in financial analysis and portfolio management. After finishing his training in banking, he remained at UBS, where he accumulated ten years of experience in private banking, investment research and institutional asset management. During this period he also spent a year getting a taste of life in the City of London, where he undertook a financial internship in private banking and asset management and was able to put his experience to use directly in private banking client portfolios.

In 1998, the financial specialist moved to Zürcher Kantonalbank, where he headed up the area of Strategy & Commodities for equities. Mr Meier has a particular soft spot for gold and commodity stocks: he was jointly responsible, among other things, for the ZKB Ressourcen Vision fund and was co-founder and portfolio manager of the ZKB Precious Metals ETF, ZKB's greatest success story in investment fund business.
